CABLE IDENTIFICATION:

Sizes 18 and 16 AWG
Ink print on one side of jacket
"(size) AWG Type 90°C wet or dry. Sunlight Resistant, 600V (UL) Direct Burial"

Sizes 14, 12 and 10 AWG
Ink print on one side of jacket
"(size) AWG Type TC 90°C wet or dry. Cdrs. (Type XHHW-2) Sunlight Resistant, 600V (UL) Direct Burial"

SCOPE:

This specification covers multiconductor cables having cross-linked polyethylene (XLP) insulation with an overall gas/vapor-tight polyvinyl chloride (PVC) jacket; conforming to Article 318 "Cable Trays" and Article 340 "Power and Control Cable Type TC" of the 1999 National Electric Code, and Standard 1277 of Underwriters Laboratories, Inc. They meet the requirements of the ICEA T-29-520 and T-30-520 flame tests as well as the 70,000 BTU "Cable Tray Propagation Test" per IEEE-383 and show reserve capabilities by also passing the 210,000 BTU flame test. Rated 600 Volts, 90°C wet and dry. Sizes 14, 12, and 10 AWG conductors are UL Type XHHW-2. They also meet the CSA FT4 and the IEEE 1202 70,000 BTU flame tests.

APPLICATIONS:

UL listed and OSHA acceptable. Recognized for use in Class 1 or 2, Division 2 hazardous locations and for installation in trays, wireways, troughs, channels, ducts and conduit. Specifically approved for direct burial, wet or dry locations and outdoors in cable trays where a sunlight resistant rating is required. Designed for control, power, lighting, telemetering, signals and relay or traffic control where a low loss, high temperature insulation is specified.

CONSTRUCTION:

CONDUCTORS

Bare, soft annealed copper per ASTM B-3

Sizes 18 and 16 AWG

Bunch stranded, class K (.010" #30 strands) per ASTM B-174, and UL-62 paragraph 10.2

Sizes 14, 12 and 10 AWG (XHHW-2)

Concentric stranded, class B (7 strands) per ASTM B-8 and UL-44 paragraph 12.6. (An opaque separator is applied between the conductor and the insulation to facilitate stripping.)

INSULATION:

Cross-linked polyethylene

Sizes 18 and 16 AWG: UL-1581 table 50.241

Sizes 14, 12, and 10 AWG: UL-44 class XL compound and ICEA S-73-532 part 3

Thickness

Sizes 18 and 16 AWG: UL-62 table 6.1 (RFH-2)

Sizes 14, 12, and 10 AWG: UL-44 table 15.3 and ICEA S-73-532 part 3 table 3-1

CABLING:

Three or more conductors are assembled round with fillers as needed. A tape binder is applied over the assembly. Sizes 14, 12 and 10 AWG have a nylon ripcord inserted under the jacket for ease of stripping. Two conductors are assembled flat parallel (round, with fillers as needed, is available upon request).

OVERALL JACKET:

Gas/vapor-tight Polyvinyl Chloride (black) per UL-1277 table 10.1 & ICEA S-73-532 part 4 table 4-2.

Thickness - Specified herein

COLOR CODING:

ICEA Method 1 using solid colors with stripes in accordance with Table E-2.

CONSTRUCTION OPTIONS:

Consult factory for specifications on cables with USE-2 or RHW-2 insulation and/or with Neoprene or CPE jackets and CSA approved cables.

Information on this sheet is subject to change without notice. All diameters are nominal values. All diameters and weights are subject to normal manufacturing tolerances.
